

RGBW AMPLIFIER

LED power repeater is suitable for all of LITECH power types(DIM,CT,RGB) LED controller's power expansion. It accepts PWM control. The controlled LED quantities would be double or triple by adding one more power repeater. Unlimited power repeaters could be connected theoretically,. It has Short circuit/Over current/anti-reverse connection safety protection. Constant voltage and constant current LED power repeater can be mixed connect, facilitate different voltage, high power and low power LED lamps controlled by one controller.

WIRING DIAGRAM :

WIRE : AWG 22-12 0.3-3.3

3.1 Diagram for the connection of repeaters with different voltage LED lamps:

220V/110Vac
